JavaScript | React | HTML5 | CSS

PROJECTS

Critical Hits

https://criticalhits.herokuapp.com/

A solo project created for my Blue Badge Presentation for Eleven Fifty. Critical Hits is a videogame review website created utilizing Postgres, Express, React, and Node. The user can search for any video game, pulling information from the IGDB API. The results are displayed as thumbnails that bring up its respective review page. The review page shows information about the videogame including platform, release date, description, and related YouTube videos. Registered users are able to view other users' reviews, and create/edit/delete their own reviews for each game.

Ghibli Engine

https://ghibliengine.firebaseapp.com/

A solo project created for my Gold Badge presentation for Eleven Fifty. Ghibli Engine is an informational website for learning about Studio Ghibli films. The user can search for films by title or release year and pull up results from the Studio Ghibli API. Each result will display the box art, title, release year, director/producer, Rotten Tomatoes score, and film summary. Character information is displayable if available.

Netflix Clone

https://adbe455.github.io/staticLayout/

A solo project created during the Gold Badge portion of Eleven Fifty. It is a recreation of the Netflix frontpage using HTML and CSS.

CSS Creature

https://adbe455.github.io/cssCreature/css-smiley.html

A solo project created early on during the Gold Badge portion of Eleven Fifty. It is a simple image of the character Jack Frost created using CSS.
